

Recruitment for the position of a PhD student in the SONATA BIS project 2020/38 / E / NZ1 / 00070 entitled:

"Role of RNA polymerase (RNAPII) elongation rate in gene expression regulation".

We are seeking a motivated PhD student to join the Mechanism of Gene Expression Regulation Laboratory. The successful candidate will have the opportunity to participate in cutting-edge research aiming at understanding the role of RNA Polymerase II elongation rate in gene expression and nervous system development. Our laboratory opens in autumn this year and is headed by Dr. Magdalena Masłoń, who previously worked, among others, at the Institute of Human Genetics in Edinburgh and at the Cancer Research Center. Our research includes a variety of state-of-the-art research techniques such as differentiation of stem cells into neural cells, advanced genome editing techniques and NGS methods, and are generously supported by NCN. The laboratory is located in Poznań at the Institute of Molecular Biology and Biotechnology, Faculty of Biology, University of Adam Mickiewicz -Institute in the forefront of scientific institutions in Poland.

The successful applicant will characterize the transcription dynamics changes and their impact on gene expression during neurodevelopment.

Requirements:

- master's degree: biology, biotechnology, bioinformatics, biophysics and similar
- proven knowledge of molecular biology, cell biology or bioinformatics methods
- scientific curiosity
- high motivation, enthusiasm and independence
- ability to work in a team
- fluency in English

Benefits:

- a scholarship of approx. PLN 4,000 / month for 48 months
- academic mentoring

Please send your applications or informal inquiries to Magdalena Masłoń (magdammason@gmail.com) until 17th of September 2021. Selected applicants will be invited to an online interview. Successful candidate will be subject to the recruitment to UAM doctoral school
